# Return

## Here's what various industry experts are saying about Mapgistics

“A Patient Intake Assessment Study indicated our institution would realize significant operational and financial benefit by applying new technology to our patient discharge workflow process. We wanted a solution that was web-based, easy-to-install, easy-to-use, easy-to-manage and provide reports that would allow us improve the management of the process. The Bed Management System has exceeded these goals. Implementation of the system has resulted in a reduction of the time it takes to discharge a patient an average 25% to 45% across all benchmarked nursing units.”

—George Murillo, CIO  
Downey Regional Medical Center  
Downey, California

“With the help of Mapgistics sophisticated data collection capabilities, we now have a much clearer picture of the competitive landscape in the managed care industry. Armed with this data, we can effectively support the information requirements of both senior management and our sales force regarding other carrier's contracted Hospital network.”

—David Carlson, Director  
Commercial Market Intelligence  
PacifiCare Health Systems
